PREFACE

This effort was performed under Program Element 62601F Project 1900. The compilation of reports was accomplished by Sgt Gregory Urda of the Environmental Sciences Branch, Engineering and Services Laboratory, Air Force Engineering and Services Center, Tyndall AFB FL. This compilation represents Technical Reports of the Environics Division since its beginning at the Air Force Weapons Laboratory in 1968. All Technical Reports listed are available from DTIC and many of the more current reports are available from the National Technical Information Service (NTIS).

This report has been reviewed by the Public Affairs Office and is releasable to the National Technical Information Service (NTIS). At NTIS it will be available to the general public, including foreign nationals.

This technical report has been reviewed and is approved for publication.

SECTION 1

INTRODUCTION

The Environics Division has been responsible for environmental quality research and development since its inception at the Air Force Weapons Laboratory in 1967. Research and development is performed in the areas of environmental chemistry, pollution monitoring, waste treatment, air pollution control, modeling, planning and environmental assessment. During its existence the Environics Division has been part of numerous organizations beginning with the Air Force Weapons Laboratory. With consolidation of civil engineering facilities research at Tyndall AFB FL, Environics became part of the Air Force Civil Engineering Center. This move was followed by organizational changes to Det 1, HQ Armament Development and Test Center, Eglin AFB FL, and the Civil and Environmental Engineering Development Office. In February 1979, the Environics Division became part of the Engineering and Services Laboratory, Air Force Engineering and Services Center, Tyndall AFB FL.

This report is a compilation of the technical reports published by the Environics Division between 1967 and 1979.

All of the reports listed are available at the Defense Technical Information Center (DTIC) and most are also available at the National Technical Information Service (NTIS). They are not available at the Air Force Engineering and Services Center. Any questions concerning research reported in these documents should be addressed to the Environics Division, HQ AFESC/RDV, Tyndall AFB FL 32403, AUTOVON 970-2097.
